

LEARN WHY

HELLENIC Inland Shrimp Farms S.A., making use of advanced BioFloc technology, the safest and most rapidly growing intensive aquaculture technology in the world, can achieve production of large, predefined quantities of top-quality shrimp, in hi-tech indoor facilities, which neither affect, nor are affected by the environment

ENVIRONMENTAL FRIENDLINESS

- Sustainable production
- No captures of wild populations
- Total bio-security
- Minimal environmental impact
- Resource-efficient facilities
- 50% of energy used derived from renewable sources
- 100% water recirculation
- Recycling of solid wastes
- Efficient use of farming byproducts

QUALITY & TASTE

- Consistently high, repeatable quality
- All natural, free of pharmaceuticals, chemicals, preservatives, taste enhancers and other additives
- Uniform, big size
- Nutritious, healthy, rich in proteins and $\omega 3$ / $\omega 6$ poly-unsaturated fatty acids, with exceptional taste

GUARANTEED FRESHNESS

- Delivered within 24 hours of harvest, never having been frozen or chemically preserved
- Subject to a strict system of controls, which ensures their total traceability from spawn until delivery to the Customer

PRICE & AVAILABILITY

- Predefined, consistent, competitive pricing policy
- Predefined, guaranteed available quantities
- Predefined, accurate, reliable, direct deliveries
- Year-round availability
